Experience

DFL Digital Sports GmbH

Cologne, Germany

SENIOR ANDROID ENGINEER

Sep. 2023 - now

- Development of the official Bundesliga app - click me.
- Led the architectural redesign of the app, breaking it down into modular app, feature, data and core modular components.
- Developed and integrated a DRM-protected livestreaming feature with Google preroll advertisements. Leveraged Android's MediaDrm and ExoPlayer for robust content protection and dynamic ad insertion.
- Led the transition from the Material theme system to Material3, setting up a custom theme system that supports both XML and Compose.
- Developed an app widget using Jetpack Glance and Jetpack Compose for real-time score display of the current match.
- Leadership role in the design and development of new data structures for the football matches using UML diagrams.
- Streamlined and enhanced the Bitrise CI/CD pipeline by implementing caching strategies and parallel job executions, achieving a reduction in build time from 15 to 10 minutes.
- Implementation of Android security crypto for storing sensitive data using EncryptedSharedPreferences.
- Optimisation of memory management by using the Android Profiler and LeakCanary.
- App release management in Google Play Console.
- Providing consultancy on Android development for other company projects.
- Interviewing and onboarding of new colleagues.

BurdaForward GmbH

Cologne, Germany

SENIOR ANDROID ENGINEER

Oct. 2016 - Aug. 2023

- Development of the FOCUS Online news app - click me.
- Implemented native ads as article teasers through Google Mobile Ads SDK, leading to a remarkable 15% boost in ad revenue.
- Implementation of the Google Cast SDK for video articles to enable content casting to TVs. Implemented features such as MediaRouter for device discovery and RemoteMediaClient for controlling playback.
- Led the development of the Android TV version of the FOCUS Online app, utilizing the Leanback library. This initiative resulted in a 10% increase in DAUs.
- Developed a custom AppWidgetProvider to manage the app widget lifecycle, using RemoteViews to display latest articles and AlarmManager for periodic updates to ensure latest content.
- Integrated support for light and dark themes by refactoring theme and style attributes, using AppCompatActivity for runtime switching, and implementing dynamic color adjustments with ContextCompat and ResourcesCompat.
- Responsible for release management (Play Console, Huawei AppGallery Connect, Samsung Galaxy Store Seller Portal, and Amazon App Store).
- Proactively drove the app's compliance with the latest Material Design guidelines.
- Ownership and leadership of the backend projects (AWS Lambda) for the FOCUS Online apps.
- Design and implementation of REST APIs to support mobile app functionality.
- Active participation in product decisions.
- Interviewing and onboarding of new colleagues.
- Facilitation and organization of internal Android developer meetings within the company.

Miga d.o.o.

Ljubljana, Slovenia

JUNIOR ANDROID ENGINEER

Jun. 2012 - Oct. 2016

- My debut Android project, created from scratch for B2B use, targeted towards maintenance personnel working on transmission lines in Slovenia.
- Developed a custom swipeable tree view layout using ViewPager and ListView, soon refactoring to RecyclerView enabling seamless navigation between parent and child nodes.
- Implemented the company's own SVN server on Ubuntu.
- Developed a background synchronization functionality by performing network requests within Android's IntentService, triggered by AlarmManager and monitored with BroadcastReceiver to periodically fetch and update maintenance data from a server.
- Developed features for plotting and analyzing transmission lines using ESRI's ArcGIS Runtime SDK.
- Implemented feature for offline map usage (ESRI ArcGIS) for maintenance personnel working in remote areas.

Education

Faculty of Computer and Information Science (University of Ljubljana)

Ljubljana, Slovenia

BACHELOR OF SCIENCE IN COMPUTER SCIENCE AND ENGINEERING

Oct. 2008 - Oct. 2014

- Recipient of the Istria County scholarship for 3 consecutive years given to students with high course grades.
- Final thesis written as a part of my first Android job at Miga d.o.o..

Skills

Android	Google Play Console, Material Design, Kotlin Coroutines, Kotlin Flow, MVVM, Jetpack Compose, Jetpack Glance, Kotlin Multiplatform, Koin
Backend	REST API, Google Cloud Platform, AWS Lambda, Spring Boot, Micronaut
QA	Manual testing, AndroidX UI Automator, Espresso, JUnit
Firebase	Remote Config, A/B Testing, In-App Messaging, Realtime Database, App Distribution
Programming	Kotlin, JAVA, LaTeX, Python
Networking	Retrofit, Ktor, Volley
OTT	Widevine, Google Cast SDK, Exoplayer
DevOps	Bitrise, AWS, Docker, Jenkins
Ad tech	Google AdMob, Xandr, Google IMA SDK
General	Git, SCRUM, Scrumban
Data governance	OneTrust
Languages	Croatian (native), Slovenian, English, German

Extracurricular Activity

Hacker School Deutschland

Germany

INSTRUCTOR

Apr. 2018 - PRESENT

- Volunteering for Hacker School - click here for more info.
- We introduce elementary and high school kids to coding using micro:bit devices, pocket-sized computers with inputs, outputs, sensors, and radio communication features.
- Courses are usually organized for two days on either school or office premises.

Writing

Mobile application to support maintenance tasks in the field

ePrints.FRI - University of Ljubljana

WRITER

Oct. 2014

- Final thesis written as a part of my job at Miga d.o.o where I developed a B2B app Power Service Assistant.
- It describes an Android app for evidencing and performing work orders by maintenance workers on transmission lines in Slovenia.
- Written in Slovenian, English abstract on page 19 - click me

About me

- Like to travel and read books.
- Aviation enthusiast, particularly interested in collecting miles in various frequent-flyer programs.
- A passionate runner, swimmer, and footballer. I also have a deep love for hiking, particularly in the summer when I explore the landscapes of the European Alps.
- Audiophile - listening mostly to thrash/death/black-metal, rock, grunge, desert, stoner, chillout and jazz.
- Huge LOST fan.
- Has two best brothers in the world, Sven and Eugen-Bernard.
- Not a code monkey.
