Experience

Handelsblatt Media Group GmbH

Düsseldorf, Germany

SENIOR ANDROID ENGINEER

Jul. 2025 - now

- Developing the Handelsblatt and WirtschaftsWoche news apps.
- Building GitHub Actions automations (e.g., auto-creating release branches and PRs) to streamline release workflows and reduce manual steps.
- Refactoring legacy components to modern architecture patterns (MVVM, Clean Architecture).

DFL Digital Sports GmbH

Cologne, Germany

SENIOR ANDROID ENGINEER

Sep. 2023 - Jun. 2025

- Built the official Bundesliga Android app, used by millions of football fans.
- Led the architectural redesign of the app, breaking it down into modular components.
- Built DRM-protected livestreaming with dynamic ad insertion, improving content security and monetization.
- Migrated the app to Material Design 3 by replacing custom UI components with standardized Material components.
- Developed an app Widget using Jetpack Compose for real-time score display of the current match.
- Designed and developed new data structures for the football matches using UML diagrams.
- Optimized Bitrise CI/CD with caching and parallelization, reducing build time from 15 to 10 minutes.
- Lowered ANR occurrences by 30% through memory profiling and leak remediation (Android Profiler, LeakCanary).
- Managed Play Console releases and store operations.

BurdaForward GmbH

Cologne, Germany

SENIOR ANDROID ENGINEER

Oct. 2016 - Aug. 2023

- Developed the FOCUS online news app.
- Integrated native ads as article teasers, increasing ad revenue by 15%.
- Added Google Cast support for video articles to enable content casting to TVs.
- Led development of the Android TV app using Leanback, contributing to a 10% increase in DAUs.
- Built a home-screen widget for latest articles with reliable scheduled updates.
- Implemented light/dark theme support and runtime switching by refactoring theme and style attributes.
- Owned multi-store release management (Play Console, Huawei, Samsung, Amazon).
- Designed and implemented REST APIs to support mobile app functionality.

Miga d.o.o.

Ljubljana, Slovenia

JUNIOR ANDROID ENGINEER

Jun. 2012 - Oct. 2016

- Developed B2B Android app for managing work orders on transmission lines, based on my [final thesis project](#).
- Designed and implemented a hierarchical swipeable UI.
- Implemented background data synchronization, ensuring reliable offline access and timely updates in remote areas.
- Added GIS features with ESRI ArcGIS for plotting and analyzing transmission lines, including offline map usage for remote areas.

Skills

Android	Jetpack Compose, MVVM, Clean Architecture, Material Design, Coroutines & Flow, Koin/Hilt, Modularization, Ktor
Security	Play Integrity API, BiometricPrompt, Android Keystore, Encrypted storage, Data safety form
DevOps	Gradle optimisation, Gradle Kotlin DSL, GitHub Actions, Bitrise, Docker, Jenkins, Release management (Play Console)
Firebase	Crashlytics, Remote Config, A/B Testing, In-App Messaging, Realtime Database, App Distribution
QA	Unit Testing, TDD, Espresso, JUnit, AndroidX UI Automator, Macro/Microbenchmark
Media & Ads	ExoPlayer, Widevine DRM, Google Cast SDK, Google AdMob, Google IMA SDK, Xandr
Methodologies	Agile, Scrum, UML, Git, Kanban
Leadership	Mentoring, Code reviews, Technical decision-making, Interviewing, Onboarding
General	Performance profiling, ANR debugging, Full app lifecycle, Scalable modular design
Languages	Croatian (native), Slovenian, English, German

Projects

- [Handelsblatt – Nachrichten](#) — Germany's leading source for business and financial news.
- [WirtschaftsWoche – Nachrichten](#) — Germany's top business magazine delivering investigative reports, financial analysis, and career insights.
- [Bundesliga: Soccer Games, News](#) — Official Bundesliga app providing live scores, match stats, news, and exclusive video highlights.
- [FOCUS online – Nachrichten](#) — One of Germany's most popular news apps covering politics, sports, finance, and lifestyle.
